TECHNICAL SKILLS

HTML5, CSS3, JavaScript, Advanced JavaScript, Bootstrap, GitHub, HTML DOM, Node.js, Database, PostgreSQL, JSON, HTTP, AJAX, NPM, React, Advanced React, React-Redux.

TECHNICAL PROJECTS

Pet Adoption Centre - Pet-adoption.com | video - Demo video

This project showcases a website of pet adoption and other facilities provided by the organisation. After registering, a user enters the website where they can select their favourite pet to adopt.

- The website is deployed on Heroku.
- User needs to register to the website to get to the home page.
- Usernames and passwords are collected in the pgSQL database and passwords are encrypted.
- Once the user has logged in, they enter the home page and can browse through several facilities provided by the organisation. On the adoption page, the user will see a number of cute dogs which they can then add to their favourites list. Later they can adopt/delete from the favourites page.
- Each user's data is stored into the database individually and is displayed when he/she login again.
- If the user logs out or inserts a wrong password, the website redirects the user back to the login page.

Weather Check - Hackathon-Weather.git | video - Demo video

This project provides temperature of different cities, which are accessible after registration. The server runs on the localhost: 3000. The website is cookies protected.

- The home page offers users to register to the website.
- Usernames and passwords are collected in the pgSQL database and passwords are encrypted.
- Once the user has logged in, there is a dropdown box with city options. After selection, the temperature and climate condition of the city is displayed.
- If the user logs out or insert a wrong password, the website redirects the user back to the login page.

EXPERIENCE

Phenicia Yerucham, Israel
Mechanical Supervisor 2017-2020

- Managed employees and supervised their work.
- Provide technical support and training.

Vishay Inter-technology Inc Dimona, Israel
Production Assistant 2015-2017

- Exemplified production and calculation efficiency.
- Achieved daily and monthly targets in a timely manner.
- Improved productivity using excellent time management skills.

EDUCATION

Developers Institute, TLV Coding Bootcamp Tel-Aviv, Israel
Full Stack Web Development, JavaScript program 06/2020-09/2020

Mumbai University (Rizvi College of Hotel Management) Mumbai, India
Bachelor in Hotel Management (BHM) 2007-2009
